“REPL” (Ready Play) as a Metaverse platform is optimal for a meeting (managing a conference) using Metaverse since it is specialized in the communication between users or between users and hosts.

Main function

Anyone can participate easily in the platform without the uncomplicated functions and the platform provides various functions to the users.

Strengthening Communication between Participants

This platform strengthens communication between each others through the functions, such as, exchanges of business cards and bulletin boards, etc., as well as eye contacts and body languages (motions of an avatar)

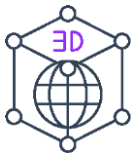

Real-time/Non-Real-time Simultaneous Supports

This platform supports real-time communications more vividly with its real 3D audios and can verify the past contents via a bulletin board even after an event.

Auto-production of Selfie 3D avatar

This provides some feeling as if you faces a real person since 3D avatars are automatically created via Selfie.

Various 3D Virtual Space Templates

This can make a space customized for each event theme by providing various kinds of 3D virtual space templates.

Total Solution for an Online Meeting

It is possible to share the materials necessary for a presentation in real-time with various types, such as, images, PDFs, videos and YouTube links, etc.

Provision of Recording Service

option

Since the recording service is provided, if necessary, it is possible to use some kinds of sketch videos and session ones, etc., as additional contents.

Main function

Anyone can participate easily in the platform with its uncomplicated functions and the platform provides various kinds of options.

Automation of Customizing

coming soon

Since the designs wanted by you can be set directly at main points of a specific space, it is free to change a design and a branding effect can be enhanced.

Video Conference-Replacing Function

coming soon

A session of vivid and highly-communicable video conference is possible with its functions showing the face of a presenting instructor or sharing a PC screen in real time.

Avatar Customizing Function

option

Since an avatar customized for a specific feature, the effects from an event can be enhanced with the avatar differentiated from other ones. (A period of time can be different depending on each range.)

Virtual Space Design

option

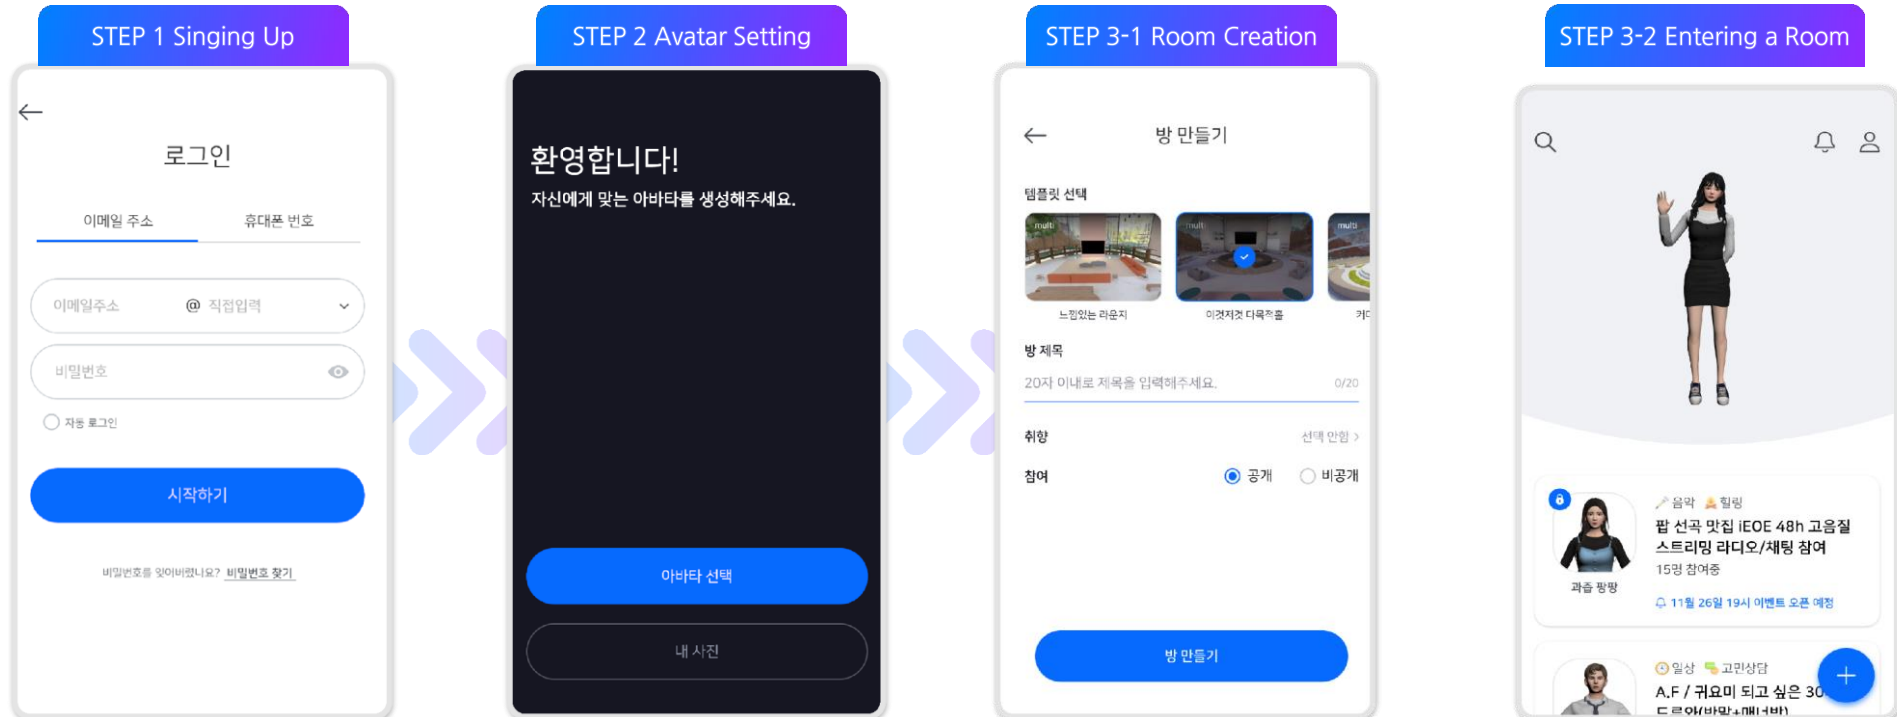

In addition to the virtual background templates provided, it is possible to make some virtual spaces suitable for the concepts of an event (Separate Inquiry)

Comparison of product

It is possible to add some functions appropriate for the scale of an event through consultation.

Functions	Basic (Free)	Standard (Charged, Negotiation)
